## Three new Z6 for airport in Nigeria

Giengen, February 2021 – In February 2021, ZIEGLER Group received an order from Nigeria for the delivery of three new Z6 airport firefighting and rescue vehicles for Anambra International Cargo Airport, Umueri.

The three identical vehicles are built on a TITAN 6x6 chassis and are equipped with a 750 HP Scania V8 engine. Kessler's innovative continuously variable transmission achieves best-in-class acceleration (0 to 50 mph in about 28 seconds) and top speed (up to 81 mph). The vehicles will also be equipped with a 12,500 liter extinguishing water tank, a 1,500 liter foam agent tank and 250 kg of extinguishing powder. With the roof-mounted Z-Turret, also newly developed in 2020, the extinguishing agent can be applied at 6000 l/min.

The delivery of the three vehicles will take place by the beginning of 2022. Further technical data can be found on the next page.
